CHAPTER 1. USAGE DATA COLLECTION

Red Hat OpenShift Data Science administrators can choose whether to allow Red Hat to collect data about OpenShift Data Science usage in their cluster. Collecting this data allows Red Hat to monitor and improve our software and support. For further details about the data Red Hat collects, see [Usage data collection notice for OpenShift Data Science](#).

Usage data collection is enabled by default when you install OpenShift Data Science on your OpenShift Dedicated cluster. See [Disabling usage data collection](#) for instructions on disabling the collection of this data in your cluster.

STAGE

1.1. Usage data collection notice for OpenShift Data Science

In connection with your use of this Red Hat offering, Red Hat may collect usage data about your use of the software. This data allows Red Hat to monitor the software and to improve Red Hat offerings and support, including identifying, troubleshooting, and responding to issues that impact users.

What information does Red Hat collect?

Tools within the software monitor various metrics and this information is transmitted to Red Hat. Metrics include information such as:

- Information about applications enabled in the product dashboard.
- The deployment sizes used (that is, the CPU and memory resources allocated).
- Information about documentation resources accessed from the product dashboard.
- The name of the notebook images used (that is, Minimal Python, Standard Data Science, etc.).
- A unique random identifier that is generated during installation to isolate data to a particular user.
- Usage information about components, features, and extensions.

Third Party Service Providers

Red Hat uses certain third party service providers to collect the telemetry data.

Security

Red Hat employs technical and organizational measures designed to protect the usage data.

Personal Data

Red Hat does not intend to collect personal information. If Red Hat discovers that personal information has been inadvertently received, Red Hat will delete such personal information and treat such personal information in accordance with Red Hat's Privacy Statement. For more information on Red Hat's privacy practices, see [Red Hat's Privacy Statement](#).

Enabling/Disabling Usage Data

You can disable usage data by following the instructions in [Disabling usage data collection](#).

1.2. Enabling usage data collection

Red Hat OpenShift Data Science administrators can choose whether to allow Red Hat to collect data about OpenShift Data Science usage in their cluster. Usage data collection is enabled by default when you install OpenShift Data Science on your OpenShift Dedicated cluster. If you have disabled data collection previously, you can re-enable it by following these steps.

Prerequisites

- You have logged in to Red Hat OpenShift Data Science.
- You are part of the OpenShift Data Science administrator group in OpenShift Dedicated.

Procedure

1. From the OpenShift Data Science dashboard, click **Settings** → **Cluster settings**.
2. Locate the **Usage data collection** section.
3. Select the **Allow collection of usage data** checkbox.

Verification

- A notification is shown when settings are updated: `Cluster settings updated successfully`.

1.3. Disabling usage data collection

Red Hat OpenShift Data Science administrators can choose whether to allow Red Hat to collect data about OpenShift Data Science usage in their cluster. Usage data collection is enabled by default when you install OpenShift Data Science on your OpenShift Dedicated cluster. You can disable data collection by following these steps.

Prerequisites

- You have logged in to Red Hat OpenShift Data Science.
- You are part of the OpenShift Data Science administrator group in OpenShift Dedicated.

Procedure

1. From the OpenShift Data Science dashboard, click **Settings** → **Cluster settings**.
2. Locate the **Usage data collection** section.
3. Deselect the **Allow collection of usage data** checkbox.

Verification

- A notification is shown when settings are updated: `Cluster settings updated successfully`.
