

Current Addon Form In OCM

Configure Red Hat Openshift API Management

CIDR range *

Required: Enter a CIDR block value or apply the default by clicking the link. IMPORTANT: You cannot modify the CIDR block value after installation.
[Use default: 10.1.0.0/26](#)

Notification email

Enter one or more email addresses for API usage alerts, separated by a space.

Quota *

Please choose a Quota from the list. IMPORTANT: changes to the configuration will update the configuration of the installation and may reduce the configured rate limit.

Addon Resource Requirements *

IMPORTANT: Before proceeding, please ensure the target cluster has sufficient resources to support the add-on install. Resource requirements are available from the Product Service Definition document: [<https://access.redhat.com/articles/5534341>]
