

Summary: Phase 2: UI Parity

Epic Name: UI Parity Completion

Customer Problem:

This Jira follows up on 3865 which focuses on building the reusable parts of the UI for the superuser. **This Jira focuses on creating parity with the current UI.**

Goal: is to build out other functionalities that are present in the current UI today and support the UI/UX experience as a whole.

Why is this important:

We are creating new changes in the UI but we must retain the foundation of the current functionality to build off of what currently works.

Prioritized deliverables:

Based on the document linked below:

- Create account page
- Main Quay Landing / Overview Page - P2
 - Team Membership - P2
 - Recent Repos I visited - P3
 - Recent activity in repos I am member of - P3
- Explore / Search - P3
 - Search results - P3
