Hi Rolfe Dlugy-Hegwer,

The following JIRA issues listed in this email are missing some information and need fixing.

The JIRA Lint tool has determined that you are the best person to ask to fix them. Most likely you are the assignee, or (for issues with no assignee) the component lead.

Issue Link (all)	Issue Summary	Problem Description & Required Action (from you)
QUARKUS-3000	Config guide - switch to quarkus.console.color instead of deprecated quarkus.log.console.color	Do not use Backlog, Resolved, Review and Release Pending states, please avoid them otherwise they can end up in a black hole (not displayed in boards). See https://docs.google.com/drawings/d/1wICQGGCJNXswnE2liBcCl68cE98T3HSHIiUuPePqO_0c/edit for the full JIRA workflow

If you are confused, or think this email has been sent in error, hit reply to let me know.

Thanks,

RHBQ Release Coordinator (via the JIRA Lint tool)
