

Replacement of AA Frontend Components

AA Frontend component	Corresponding framework component
AuthorizationErrorPage	<ol style="list-style-type: none"> 1. EmptyStateUnauthorized (401 error) 2. EmptyStateError (no error status) 3. EmptyStateNoData (404 error) 4. EmptyStateUnauthorized (403 error)
NoData	EmptyStateNoData
NoResults	EmptyStateFilter
ApiErrorState	ErrorBoundary
LoadingState	LoadingPage
Grid (organization statistics, clusters, reports list pages)	PageDashboard
FilterableToolbar	<ol style="list-style-type: none"> 1. Wrapped in PageTable component for job explorer, savings planner and notifications pages 2. PageToolbar for organization statistics, clusters and reports
Pagination	<ol style="list-style-type: none"> 1. Wrapped in PageTable component for job explorer, savings planner and notifications pages 2. PagePagination for report details
EmptyList	EmptyStateFilter
ToolbarDeleteButton, ErrorDetail, AlertModal (savings planner)	The actual button will be wrapped PageToolbar, and the action/modal will be replaced with useBulkConfirmation
Form	PageForm
ReportTable TableComposable	PageTable
Tabs/Tab (savings planner details tab)	PageTabs/PageTab
DescriptionList/DescriptionListTerm	PageDetails/PageDetail

Points to clarify:

- Redesign “Notifications” page
 - Can it be a table?
 - Yes, redesign using PageTable component
 - Each notification is clickable but does nothing- what is the intended behavior?
 - It should link to the tower URL.
