

Recommendations

2 total incidents

5

New Recommendations	Total Risk	Systems
 Active rule 1	 Important	1
Active rule 6 with a very long text to validate the carriage return	 Moderate	1

Resolved Recommendation	Total Risk	Systems
Active rule 2	 Low	1

Deactivated Recommendations	Total Risk
Active rule 3	 Critical
 Active rule 4	 Critical

Compliance below threshold

Red Hat Insights has identified one or more systems that have reported with a compliance level below your specified threshold or have not reported at all. Please review the [Insights Compliance service](#) to further assess and determine next steps.

Baseline drifts

3 drifts from associated baselines on your 1 system

3

Baseline	Systems
baseline_1	1
baseline_2	1
baseline_3	1

Launch failures

1 launch attempts failed

1

AWS	Azure	Google cloud
1	0	0

Successful launch

2 launch attempts deployed 4 instances

2

AWS	Azure	Google cloud
2 (4 instances)	0 (0 instances)	0 (0 instances)

Hosts with validation error

2

Red Hat Insights has identified 2 hosts that presented a validation error. For errors in updating hosts, please review the Insights Inventory service to further assess and determine next steps.

If no hosts were created by these changes, these errors will not appear in the service.

Host Name	Error
random_name	error 1
random_name2	error 2
