Which process guides the final approval for a release in SAFe?	
A. Release Governance	
B. Lean Portfolio Management	
C. Product Management	
D. Continuous Delivery Pipeline	

Answer: A

#### Explanation:

: Release Governance is the process that guides the final approval for a release in SAFe. It involves a set of roles and responsibilities that ensure the quality, compliance, and fitness for purpose of the solution before it is released to customers. Release Governance also coordinates the timing and frequency of releases based on market demand and business needs. Release Governance is part of the Release on Demand aspect of the Continuous Delivery Pipeline, which is the fourth and last element in the four-part pipeline of Continuous Exploration, Continuous Integration, Continuous Deployment, and Release on Demand.
